

## AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

### LISTING OF CLAIMS

1-20. (Cancelled)

21. (Currently Amended) A latch for a tool container, comprising:

a body;

a channel in said body for receiving a rail having an arcuate surface spanning from one side of the rail to another, said channel defined by an arcuate base surface in said latch adapted to mate with the arcuate surface of the rail from one side to the other side, two side walls extending from said base and two flanges extending from said side walls towards one another and said base, two side walls and two flanges surround the sides of the rail.

22. (Original) The latch according to Claim 21, wherein said base surface is arcuate along both a longitudinal and lateral axis.

23. (Original) The latch according to Claim 21, wherein one of said flanges including a cut-out enhancing coupling with said rails.

24. (Original) The latch according to Claim 21, wherein said latch including indicia indicating a locked and unlocked position.

25. (Original) The latch according to Claim 24, wherein said latch includes a second indicia indicating direction of movement.

26. (Currently Amended) The latch according to Claim 21, wherein said latch is comprised of a first member covered by a second member.

27. (Original) The latch according to Claim 26, wherein said first member providing rigidity to said latch.

28. (Original) The latch according to Claim 26, wherein a portion of said first member extending through said second member providing an indicia member and said portion having a surface substantially flush with said second member.

29. (Original) The latch according to Claim 28, wherein said second member including a second indicia member.

30. (Original) The latch according to Claim 21, wherein said body having an arcuate outer surface enabling manipulation by a user.

31. (Original) The latch according to Claim 26, wherein said second member is a soft material providing a gripping surface.

32. (Original) The latch according to Claim 26, wherein said first member being formed from polypropylene and said second member formed from krayton.

33-65. (Cancelled)

66. (Original) The latch according to Claim 29, wherein one of said indicia is in a contrasting color with respect to the other.

67. (Original) The latch according to Claim 66, wherein said first member indicia being yellow and said second member including said second indicia being black.

68. (Cancelled)

69. (New) A latch for a tool container, comprising:

a body;

a channel in said body for receiving a rail, said channel defined by an arcuate base surface in said latch, two side walls extending from said base and two flanges extending from said side walls towards one another; and

said latch including a first member covered by a second member, a portion of said first member extending through said second member providing an indicia member and said portion having a surface substantially flush with said second member.

70. (New) The latch according to Claim 69, wherein said second member including a second indicia member.
